

Your **TESTING RESOURCE PARTNER**
for transportation science, systems & components

IN-USE VERIFICATION PROGRAM | IUVP

Your car's manufacturer trusts us to provide its third party in-use verification testing. Through this program and in support of the Environmental Protection Agency (EPA) and the California Air Resources Board (CARB), our labs perform testing to make sure vehicles not only meet emission standards when they are new, but also remain compliant across the years.

When you drop off your vehicle we'll guide you through our process and can even show you where your vehicle will be tested. Rest assured your vehicle will be handled with the utmost care.

WHAT CAN I EXPECT?

- You can pick up your newer model rental car at the same time and location as your drop off
- Your rental will have a full tank of fuel
- We'll need your car for approximately two weeks to complete all necessary testing, this can vary depending on the testing required
- You will receive your incentive check when you pick up your vehicle after the testing has been completed – no waiting for a check in the mail
- The exterior and interior of your car will be cleaned before pickup, and you will have a full tank of fuel

WHAT TESTING WILL BE DONE?

- In-use testing is performed in our labs on our advanced chassis dynamometers, also referred to as a dyno, this testing equipment is much like a big treadmill
- Your vehicle will be run on an indoor dyno to safely simulate real world driving conditions without exposing your car to the elements or dangers of the road
- We will be testing for the emissions your car gives off in these real world driving conditions and will be providing the vehicle manufacturer with data and reports outlining the current performance characteristics of your car
- This data not only helps your car manufacturer meet EPA and CARB emission requirements but also helps inform the development of future models of your car

WHERE DO I DROP MY CAR OFF?

- You can drop your car off at one of our emissions testing facilities.
- **Aurora, Colorado:**
[2022 Helena St.](#)
Just minutes from the intersection of Colfax Ave and Chambers Rd
- **Columbus, Indiana:**
[635 S Mapleton St.](#)
